**Objectives: At the end of this conference participants will be able to:**

1. Describe the important components related to nursing research and health care policy making.
2. Describe current nursing research applicable to health care policy reform.
3. Discuss the personal and professional impact of health care policy in the lives of nurses.
4. Describe at least three roles of nursing in promoting health care policy.
5. Describe strategies nurses can take to optimize health care policy at work and in the community.
6. Identify personal, community, and workplace health care policy activities.
